The integrity of the security perimeter shall not be compromised by other functions.</p> <p>Video documentation reveals I/M Wood exited the unsecured 'receiving door', that was controlled by the central control room officer, and entered the sally port area. The sally port was also left unsecured. I/M Wood was able to exit the facility, enter the unsecure work shed and take what was believed to be two (2) machetes. I/M Wood left the facility grounds by exiting through the back gate which was also unsecured due to being inoperable.</p>

3	275	.1	<p>Every facility shall have the appropriate number of jailers at the facility 24 hours each day. However, video documentation revealed that I/M Wood escaped the facility at approximately 0605. I/M Wood was not discovered to be missing until approximately 0725.
